## STEEL FENCE

**Material:** Steel Surface treatment process with 4 protective layers:

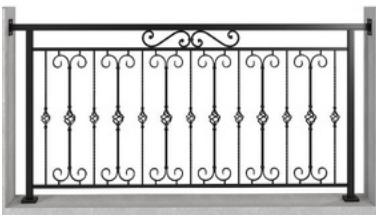

- Galvanize:** Using pre-galvanize materials that help protect the products from oxidation.
- Phosphate conversion coating** helps improve corrosion resistance, enhance appearance, promote adherence.
- Primer coating:** Priming is a key to double protection of products.
- Finishing coating:** high -quality, lead-free powder coat and UV resistance in compliance with American Standard TC AAMA 2603
